CBRN/TIM SAMPLING KIT

CBRN/TIM Sampling Kit is a dynamic field sampling collection kit designed for first responders (emergency responders), military or other operational personell to take samples of chemical, biological and radiological agents, including toxins and other toxic industrial materials.

CBRN/TIM Sampling Kit is especially designed for first responders (emergency responders), military or other operational forces requiring the ability to conduct effective field sample collection during a CBRN event.

This sampling kit is an easy-to-use kit with all the equipment and procedures necessary for proper sample collection.

The sampling kit can be used for collection of the following sample types:

- **Fluid samples**
(including water samples)
- **Soil samples** (including sediment, sand, gravel, clay etc)
- **Powder samples**
- **Surface samples**
- **Object and vegetation samples**

CBRN/TIM Sampling Kit is delivered with an instruction manual featuring detailed procedural guidelines.

Sampling matrices

Tables with various sampling matrices that are possible using the equipment. For each matrix, suggestions are given regarding the equipment that can be used, in which kit case the item is located, sample volumes, etc.

Technical data

The sampling kit is stored in a waterproof and shock absorbing plastic case.

Part no: ARE-010302001
Dimensions: 488x386x229 mm
Weight: Approx 8.5 kg

1. **Documentation binder**
 - Sealing tape
 - Sample documentation form
 - Chain of Custody
 - Instruction Manual
2. **Clipboard/sample evidence board**
3. **C-protective plastic**
4. **Glass bottle, 250 ml**
5. **Gloves**
6. **Glass bottles, 100 ml**
7. **Pens**
8. **Vials, 40 ml**
9. **Gas-impermeable plastic bags, cable ties, tie tensioner**
10. **Scissors**
11. **Sterile spatulas, tweezers, spoons, scalpels, pasteur pipettes, wipes**
12. **Glass bottle, 1000 ml**
